SOP: Daily NAV Calculation

Timeline

Fund accountants must strike the daily net asset value (NAV) by 6:00 PM Eastern Time. Pricing files from vendors arrive by 4:45 PM.

Price Tolerance

Any security with a day-over-day price move greater than 5 percent is flagged as a price exception and must be validated against a second pricing source.

NAV Errors

A NAV error of 0.50 percent or more for money market funds, or 1 percent or more for other funds, is material and requires shareholder reprocessing. Material NAV errors must be reported to the fund board.
